EDUCATION

Pennsylvania State University *University Park*

August 2024 - May 2028

- *College of Engineering*: BS, Computer Science; Minor in Computational Foundations of Cybersecurity GPA: 4.00
- *Eberly College of Science*: BS, Mathematics
- Relevant Coursework: Data Structures & Algorithms, Systems Programming, Linear Algebra/Matrices, Theory of Computation, Communication Networks, Differential Equations, Calculus III, Fourier Series

PROJECT EXPERIENCE

HeartMetrics *IBM SkillsBuild: AI Experiential Learning Lab*

February 2026 - Present

- Collaborate in a multi-disciplinary team of 5, constructing a front-end using React and Vercel that connects to a back-end that uses Python, Flask, Supabase, REST APIs, OAuth, and PostgreSQL to store/retrieve data securely
- Integrate agentic AI to improve the work of managers in fostering work wellness in teams, focusing on user experience and needs to alleviate pain points by storing, manipulating, and interpreting employee data
- Organize and lead team meetings, completing weekly deliverables and aligning team goals and visions

Myria

June 2023 - Present

- Craft efficient 3D models and animations in Blender with procedural textures, rigging, and keyframes
- Leverage Blueprint and C++ to create movement scripts, quest management scripts, and user interfaces
- Operate Unreal/OpenGL to create environments, a physics engine, shaders, and optimize runtime procedures
- Compose various styles of music for violin, piano, voice, and flute to elevate player experience

DoomScholar

February 2026

- Won first place in a hackathon, winning a total of \$3000 with a project that interrupts scrolling with studying
- Constructed a minimum viable product designed around student needs and psychology in under 3 hours, delegating tasks efficiently, utilizing vibe coding, limiting scope, and managing multiple tasks at a time
- Integrated RESTful APIs and RAG LLMs to design relevant studying features catered to the students' needs
- Pitched the project with minimal preparation time, addressing a diverse, non-technical audience explaining the purpose of the project and its functionality within two minutes, using analogies to elevate understanding

MyCord Client

December 2025

- Applied knowledge of servers, networking, multithreading, multiprocessing, signal handling, error handling, and input/output to send and receive messages from a server into a terminal-based client
- Reimplemented the program using an AI-workflow, reducing development time by 44%, improving organization, removing all potential memory leaks, and handling signals, errors, terminations, and clean-ups with grace

LEADERSHIP EXPERIENCE

Conference Director *Society of Asian Scientists and Engineers*

April 2026 - Present

- Coordinate weekly events to enhance members' professional development and explore Asian culture/heritage
- Plan a trip taking 16 members to a national conference in Seattle, Washington, working within a budget of \$10K, registering for career events, and ensuring a smooth experience allowing members to focus on development

Presidential Leader, Liaison *Presidential Leadership Academy*

April 2025 - Present

- Develop critical thinking skills for informed leadership decisions, mentored by President Neeli Bendapudi
- Broaden perspectives on sociopolitical issues and developing leadership skills and philosophies by attending 3+ field trips around the country, listening to 36+ renowned speakers, and analyzing campus-wide issues
- Plan/direct events to increase involvement, develop skills and values, and foster inclusive and supportive culture
- Present viable solutions to current university issues considering cost, brand, effectiveness, and stakeholders

WORK EXPERIENCE

Co-Founder, Technology Chair *ChemQuestPA*

September 2023 - August 2024

- Designed a website to advertise old events, gain interest in upcoming events, and introduce team members
- Organized 3 events for 120+ kids to perform science experiments and develop interests in STEM subjects safely
- Planned bake sales to fundraise over a total of \$700 and increase student interest by 63%
- Mentored a team of 8 students for 4 months, developing communication, leadership, and technical skills

SKILLS

Soft: Teamwork, Critical Thinking, Time Management, Communication, Leadership, Problem Solving, AI Workflow

Technical: Java, Python, C, SQL, Git, CSS, HTML, JS/TS, React, Linux, Networks, Supabase, Flask, OAuth, REST APIs, Vercel

Languages: French [Limited Working Proficiency], Chinese [Elementary Proficiency]
