EDUCATION

Pennsylvania State University *University Park*

August 2024 - May 2028

- *College of Engineering*: BS, Computer Science and Mathematics GPA: 4.00
- Relevant Coursework: Data Structures & Algorithms, Systems Programming, Linear Algebra/Matrices, Theory of Computation, Communication Networks, Differential Equations, Calculus III, Fourier Series,

SKILLS

Soft: Teamwork, Critical Thinking, Time Management, Communication, Leadership, Problem Solving, AI Workflow

Technical: Java, Python, C Languages, SQL, Git, CSS, HTML, JS, React, Linux, Unreal Engine

Languages: French [Limited Working Proficiency], Chinese [Elementary Proficiency]

PROJECT EXPERIENCE

EmBody

June 2025 - Present

- Collaborate in a team of 3, applying React in app development and creating intuitive UIs to “gamify” fitness
- Utilize APIs to gather data for tracking calories, nutrients, minerals, and food recommendations

Myria

June 2023 - Present

- Craft efficient 3D models and animations in Blender with procedural textures, rigging, and keyframes
- Leverage Blueprint and C++ to create movement scripts, quest management scripts, and user interfaces
- Operate Unreal/OpenGL to create environments, a physics engine, shaders, and optimize runtime procedures
- Compose various styles of music for violin, piano, voice, and flute to elevate player experience

MyCord Client

December 2025

- Applied knowledge of servers, networking, multithreading, multiprocessing, signal handling, error handling, and input/output to send and receive messages from a server into a terminal-based client
- Reimplemented the program using an AI-workflow, reducing development time by 44%, improving organization, removing all potential memory leaks, and handling signals, errors, terminations, and clean-ups with grace

Course Scheduler

April 2025

- Designed using Apache Derby databases and embedded SQL in Java to store data, organized using OOP

Robotic Vehicle and Arm

September 2023 - June 2024

- Built a driving vehicle using motors, servos, and arduino with the ability to pick up and transport items
- Maintained a modular codebase (in C), translating digital signals into physical motion to drive, turn, and grab

Chess Application and Chess Bot

May 2022

- Constructed and designed a chess application that allows players to play against a chess bot in Java & Swing
- Leveraged recursion to calculate the best moves for opponents; the capture of pieces determine best moves

LEADERSHIP EXPERIENCE

Presidential Leader, Liaison *Presidential Leadership Academy*

April 2025 - Present

- Develop critical thinking skills for informed leadership decisions, mentored by President Neeli Bendapudi
- Broaden perspectives on sociopolitical issues and developing leadership skills and philosophies by attending field trips around the country, listening to renowned speakers, and analyzing campus-wide issues
- Plan/direct events to increase involvement, develop skills and values, and foster inclusive and supportive culture
- Present viable solutions to current university issues considering cost, brand, effectiveness, and stakeholders.

Violin 2 Section Leader *Campus Orchestra (PSU)*

September 2024 - May 2025

- Acted as a liaison between the conductor and section to ensure uniform creative expression and sound quality
- Demonstrated difficult passages to the section, creating fingering patterns to facilitate practice

Captain *Garnet Valley Boys Volleyball*

March 2022 - June 2024

- Fostered skill development, confidence, discipline, a resilient mindset, and maintained morale in the team
- Assisted in developing game strategies, adjusting plays based on team strengths, opponents, and current state

WORK EXPERIENCE

Co-Founder, Technology Chair *ChemQuestPA*

September 2023 - August 2024

- Designed a website to advertise old events, gain interest in upcoming events, and introduce team members
- Organized 3 events for 120+ kids to perform science experiments and develop interests in STEM subjects safely
- Planned bake sales to fundraise over a total of \$700 and increase student interest by 63%
- Mentored a team of 8 students for 4 months, developing communication, leadership, and technical skills
- Managed tight deadlines, especially during exam, performance, and sports seasons, ensuring accountability
